Enzymes in the Environment: Activity, Ecology & Applications

17-21 July, 2011

Bad Nauheim, Germany

Bad Nauheim combines nature, internationally renowned Art Nouveau architecture, and culture. It was the destination for European aristocracy in the late 1800s and continues to be world famous for its thermal salt baths at the edge of the Taunus. Nearby are many attractions including the spectacular Romantic Rhine Boat Cruises of Medieval Castles.

Topics

- Proteomics and genomics of extracellular enzyme expression
- Enzymic remediation and biodegradation of recalcitrant pollutants
- Enzymes as indicators of soil quality and resilience
- Microbial ecology of enzymes in terrestrial and aquatic ecosystems
- Emerging methods for enzymology and microbial ecology research
- Rhizosphere enzymes and other signaling molecules to deliver agricultural and environmental services
- Extracellular enzyme expression in a changing climate
- Biogeography of soil and aquatic enzymes

Organizing Committee

Pr. Richard Burns, University of Queensland, Australia
Pr. Jose M. Barea, Es. Exp. del Zaidin, CSIC, Spain
Pr. Ryszard J. Chrost, Warsaw University, Poland
Pr. Shiping Deng, Oklahoma State University
Pr. Richard P. Dick, Ohio State University, USA
